## Guide to Flow Cytometry

### EDITOR

**Sonja Wulff**

Dako ▪ Fort Collins, Colorado, USA

### TECHNICAL ADVISORS

**Kathleen Martin**

Dako ▪ Fort Collins, Colorado, USA

**Angela Vandergaw**

Dako ▪ Fort Collins, Colorado, USA

### CONTRIBUTORS

**Thomas Boenisch, MS**

Dako ▪ Carpinteria, California, USA

**Ian Brotherick, PhD**

Dako ▪ Ely, United Kingdom

**Terry Hoy, PhD, FRCPath**

University of Wales College of Medicine ▪ Cardiff, Wales, UK

**Jim Hudson, PhD**

Dako ▪ Carpinteria, California, USA

**Christina Jespersgaard, PhD**

Dako ▪ Glostrup, Denmark

**Peter Lopez**

Aaron Diamond AIDS Research Center ▪ New York City, New York, USA

**Alberto Orfao, MD, PhD**

Centro de Investigación del Cancer ▪ Salamanca, Spain

**W. Roy Overton, PhD**

Dako ▪ Fort Collins, Colorado, USA

**Stephen W. Pursley**

Dako ▪ Fort Collins, Colorado, USA

**John Ransom, PhD**

Novasite Pharmaceuticals ▪ San Diego, California, USA

**John Sharpe, PhD**

Dexcel Limited ▪ Hamilton, New Zealand

**Carleton C. Stewart**

Roswell Park Cancer Center ▪ Buffalo, New York, USA

**Ian Storie**

Dako ▪ Glostrup, Denmark

**Lars Winther, PhD**

Dako ▪ Glostrup, Denmark

## Table of Contents

### **Foreword: An Introduction to Flow Cytometry v**

### **Evolution of Flow Cytometry**

The Microscope **1**; Dye Chemistry **1**; Electronics Industry **2**; Computers **2**;  
Modern Flow Cytometry **3**

### **Cell Biology**

The Nucleus **5**; The Cytoplasm **6**; The Membrane **7**; Cell Preparation **7**

### **Flow Cytometry Instrumentation**

Flow Cytometer Operation **9**; Fluidics **11**; Optics **11**; Electronics **13**; Software **13**;  
Time, Ratios and Computed Parameters **14**; Interpretation of Acquired Data **14**; Sorting **14**;  
Automation **15**; Technical Considerations **15**

### **Fluorochromes**

Physics of Light **17**; Excitation and Emission **18**; Fluorochrome Selection **19**

### **Antibodies**

Immunoglobulins **23**; Polyclonal Antibodies **26**; Monoclonal Antibodies **27**;  
Antibody Affinity **28**; Antibody Cross-Reactivity **29**; Antibody Saturation Rates **29**;  
Antibody Stability **30**; Antibody Handling **31**

### **Data Analysis**

Introduction **33**; Analysis **33**; Compensation **37**; Data Storage **38**; Conclusion **38**

### **Standardization, Calibration and Quality Control**

Standardization **41**; Calibration **43**; Quality Control **44**

### **Flow Sorting**

Introduction **47**; Principles **47**; Yield, Recovery and Purity **50**; High-Speed Sorting **54**;  
Viability and Function **54**

### **Rare-Event Detection**

Introduction **55**; Definition **55**; Counting Statistics **56**; Correcting for Backgrounds **57**;  
Applying Confidence Limits **58**; Sorting Rare Events **58**

### **Immunophenotyping**

Introduction **59**; Applications **60**; Cellular Information **65**; Techniques **67**

**Table of Contents...continued**

**Small-Particle Analysis**

Introduction **69**; Applications **69**; Theory **70**; Instrument Optimization **73**

**MHC Multimers**

Major Histocompatibility Complex **76**; MHC Multimers **77**; Technical Considerations **78**

**Fluorescent Proteins**

Introduction **81**; Use in Cytometry **82**; Fluorescence Resonance Energy Transfer **84**;  
Experimental Protocol for FRET Flow Cytometry **86**

**Signal Transduction**

Definition and Overview **89**; Measurement of Signal Transduction Events **91**

**Kinetics**

Definition and Overview **93**; Measurement of Kinetic Events **94**;  
Measurement of Ca<sup>2+</sup>; Response Kinetics **96**

**Basic DNA Measurement by Flow Cytometry**

DNA Probes **99**; Terminology **100**; Ploidy **101**; Sample Preparation **101**;  
DNA Stability **102**; Instrument Set-Up **104**; Standardization **104**;  
Data Analysis and Reporting **104**; DNA and Beyond **105**

**Absolute Cell Counting**

Applications **107**; Methods **108**; Technical Considerations **111**

**Glossary 115**

**Index 117**
